

ELECTRONIC MODULAR SWITCHING SYSTEM  
KX-T123210DB/KX-T123210D

**Installation and Operation Manual  
for Added and Changed Features**

Please read this Manual first and then another Installation Manual for programming.

This manual is available for KX-T123210DB/KX-T123210D which have  
the mark (2) on the plate as shown below.

**Panasonic EASA-PHONE**  
MODEL NO. KX-T123210DB  
TELEPHONE EQUIPMENT

②

**Note:**

1. Use the "STORE" key instead of "MEMORY" key, for KX-T7020, 7030, 7050 and 7130 do not have the "MEMORY" key.
2. Use the "AUTO ANSWER" key instead of "AUTO ANS" key, for KX-T7020, 7030, 7050 and 7130 do not have the "AUTO ANS" key.
3. For the Features of Flexible keys, refer to this manual.
4. Extension of jack number 01 should be connected to KX-T7030, 7130, 30830, 61630, 123230, 123230D and 123235, for programming system data.
5. All the programming procedures described in the Installation Manual have been modified. Delete the step 2 "Press the NEXT button" from every feature of the programming in another Installation Manual. For the further detail, see page 4 of this manual. This manual describes the revised procedures from which the step 2 has already been deleted.

## System Component

|                           | Model No.                                                                                                                                               | Description                                                                                                                                                                                                                                                                                                                                                                                                       |

## Example of Programming

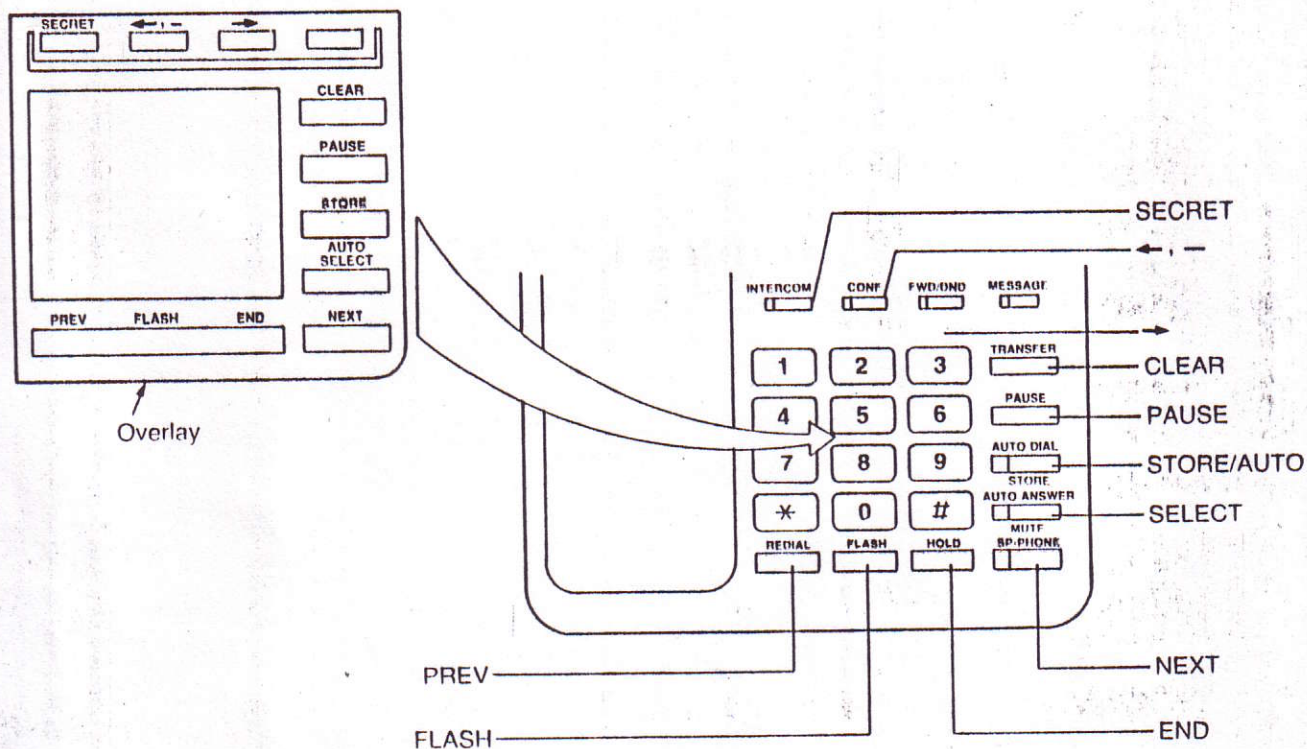

All the programming procedures described in the Installation Manual have been modified. Delete the step 2; "Press the NEXT button" from every feature of the programming in another Installation Manual. See the example below — the portion that should be deleted is shown shaded.

This manual describes the revised procedures from which the step 2 has already been deleted, as "Revision" below.

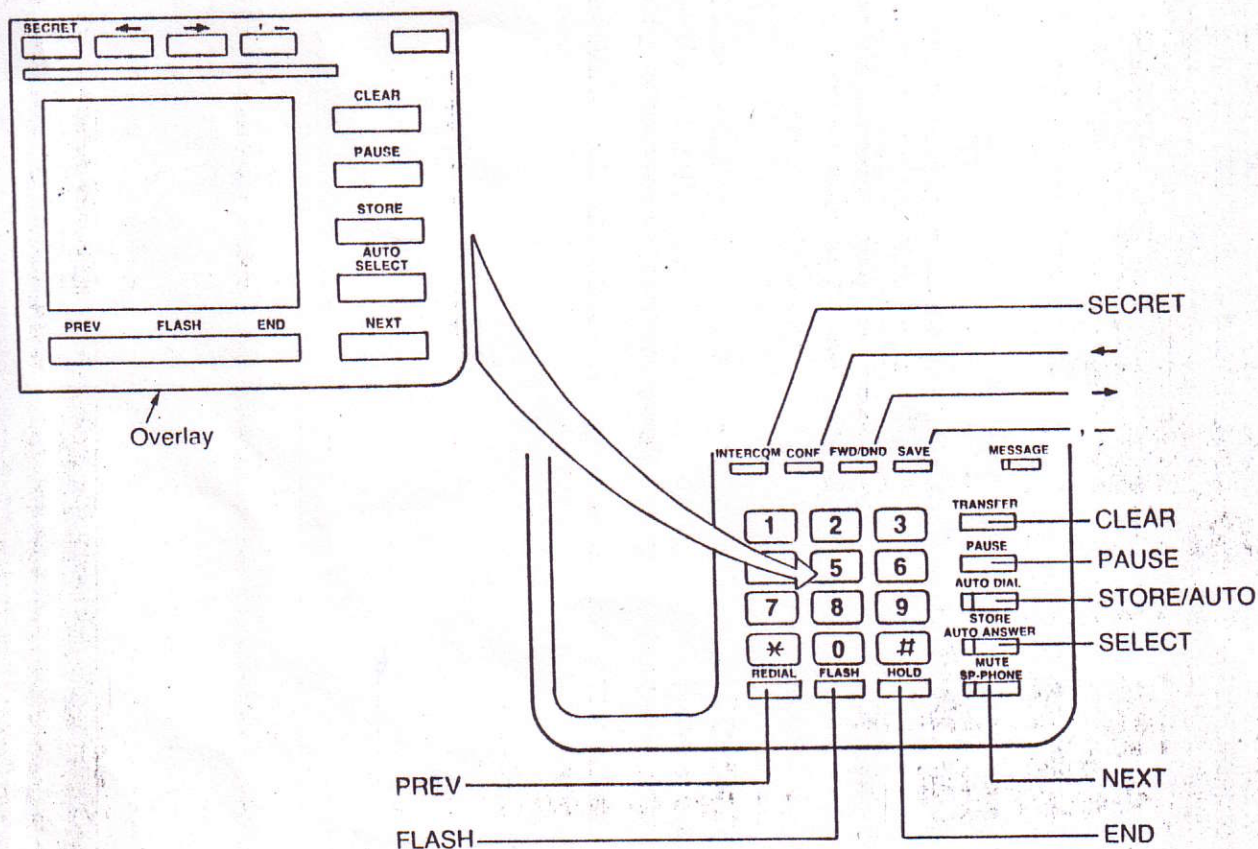

| Original                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Revision                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

When the System Program Switch on the KX-T123210 is set to the PROGRAM position, the function of the KX-T7030 and the KX-T7130 connected to jack number 01 will change as follows.

### KX-T7030

### KX-T7130

## Added Features

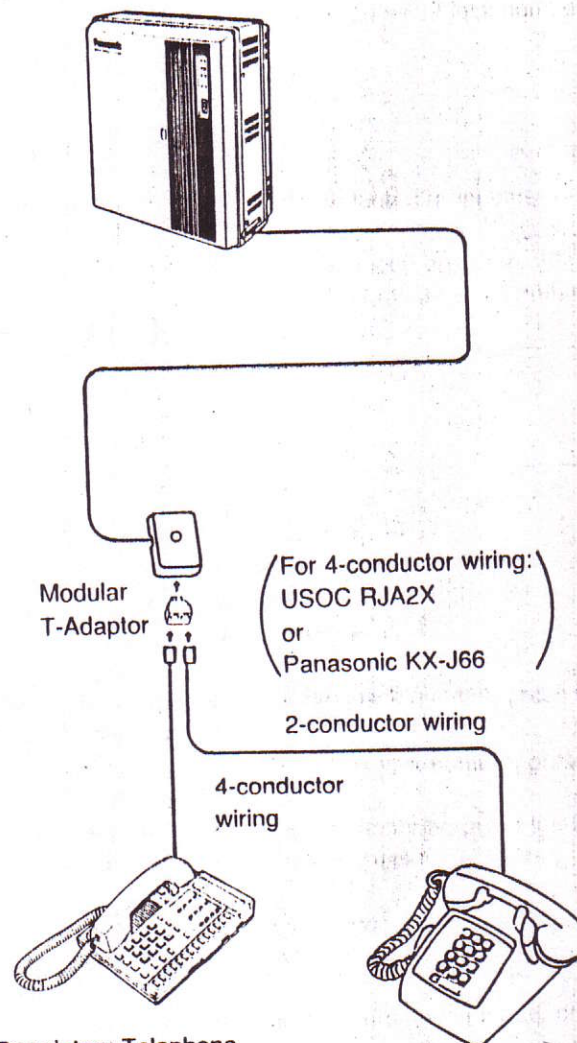

## The Parallel Connection of the Proprietary Telephone and the Standard Telephone

- Any extension can be connected in parallel with the proprietary telephone and the standard telephone.
- In the event of a power failure, CO1, CO2, CO5, CO6, CO9 and CO10 can be accessed using the standard telephones that are connected in parallel with proprietary telephones to extensions of jack number 01, 02, 09, 10, 17 and 18 respectively.
- If the extension receives a call, a ringing will be heard from the proprietary telephone and the standard telephone. You can answer the call by using either the proprietary telephone or the standard telephone.
- An answering machine, a facsimile, a MODEM (personal computer) etc. can be connected instead of the standard telephone.
- You can program that the standard telephone will not work. For programming, refer to the "Standard Telephone Connection with Proprietary Telephone" on page 8 in this manual.

### Note:

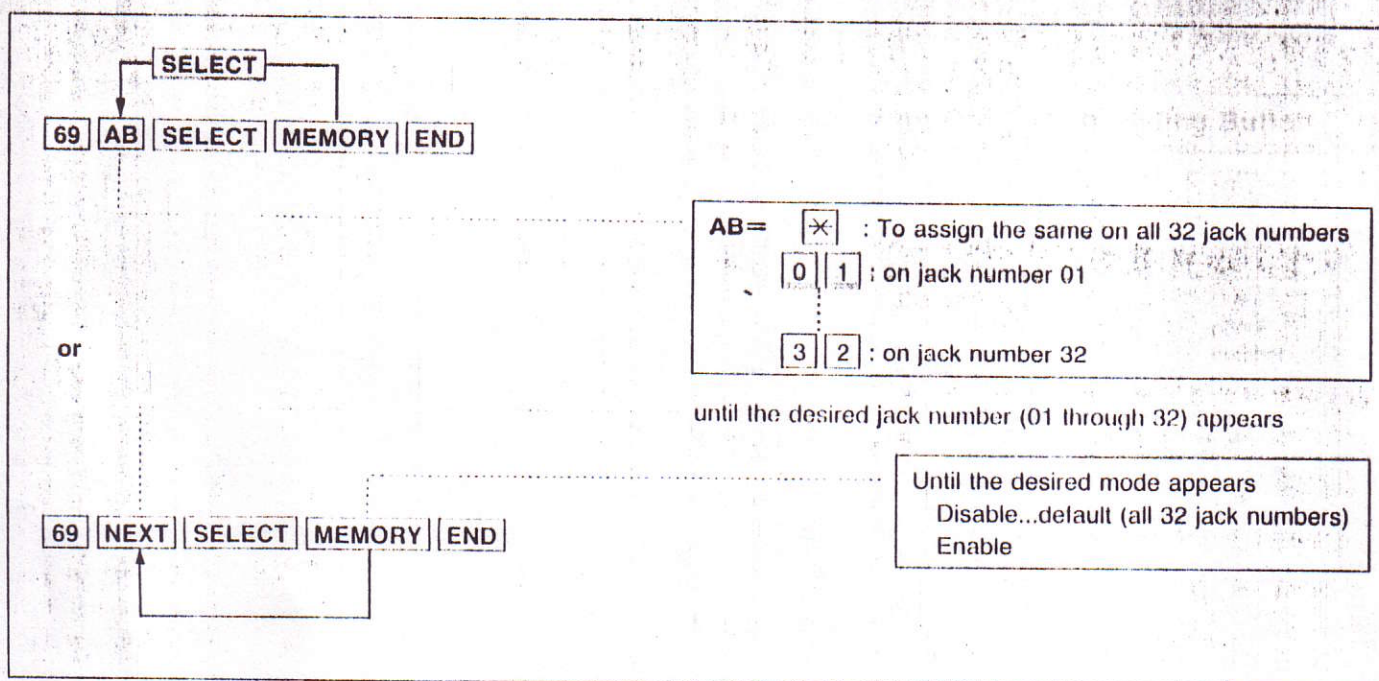

- The LCD on the proprietary telephone will show you the standard telephone is used.
- The following features will not work by the standard telephone connected in parallel with the proprietary telephone.
  - Call splitting
  - External feature access
  - Account code input
  - Conference
  - Pickup dialing
- The standard telephone connected in parallel with the proprietary telephone can not make a call in the following cases;
  - The proprietary telephone is set to BGM mode.
  - The proprietary telephone is receiving the paging through the built-in-speaker.
  - The proprietary telephone is set to PROGRAMMING mode.
- The standard telephone connected in parallel with the proprietary telephone will not ring in the following cases;
  - The proprietary telephone is set to Automatic Answer-Intercom.
  - The proprietary telephone is set to Voice alerting mode.

Proprietary Telephone  
 KX-T123220  
 KX-T123230  
 KX-T123230D...※  
 KX-T128235 .... ※  
 KX-T123250  
 KX-T61620  
 KX-T61630  
 KX-T61650  
 KX-T7020  
 KX-T7030  
 KX-T7050  
 KX-T7130 ..... ※  
 KX-T30830

- The models above which have a mark ※ require the 6-conductor wiring.

## Standard Telephone Connection with Proprietary Telephone

### Description

Through programming, you can select whether the standard telephone which is connected in parallel with the proprietary telephone works or not.

Enable ..... The standard telephone works.

Disable ..... The standard telephone does not work.

### Programming

1. Dial (69).  
"Jack NO? → " will be displayed.
2. Press the NEXT button or dial the jack number (01 through 32 or ✱).  
"#01: Disable" will be displayed and  
"Disable" will blink.
3. Press the SELECT button to alternate between  
"Disable" and "Enable" to select the desired mode.

4. Press the MEMORY button.  
The LCD will stop blinking.
5.
  - To advance to the next jack number, press the NEXT button.
  - To return to the previous jack number, press the PREV button.
  - To go to a desired jack number, press the SELECT button and then dial the jack number.
6. Repeat steps 3 to 5, to program the ringing mode on the other jack numbers.
7. To return to the initial programming mode, press the END button.

### Conditions

When a call reaches to KX-T30830, 61630, 123230 or 123235, two types of ring tones sound. This is normal and we recommend you to select "Disable" by programming if you do not use the standard telephone.

### Programming Table

See page 50.

## Flexible MESSAGE (Message Waiting) Button

### To Change into DSS Button

Press  
MESSAGE

Dial "1"

Dial the  
extension  
number  
which is  
set newly  
(100 through 199)

Press  
MEMORY

### Description

Allows the MESSAGE button to change into the DSS (Direct Station Selection) button.

The proprietary telephone is available.

### Operation

- Be sure the handset is in the cradle and the SP-PHONE button is off.
- Set the MEMORY switch of the proprietary telephone to "PROGRAM".

1. Press the MESSAGE button.
2. Dial (1).
3. Dial the extension number which is set newly (100 through 199).
4. Press the MEMORY button.

#### To return to the MESSAGE button:

1. Press the MESSAGE button.
2. Dial (3).
3. Press the MEMORY button.

- After programming the MESSAGE button, return the MEMORY switch to the "SET" position.

### To Change into One Touch Dialing Button

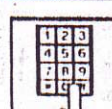

Press  
MESSAGE

Dial "2"

Dial "9"

Dial  
phone  
number

Press  
MEMORY

### Description

Allows the MESSAGE button to be used as a one touch dialing button.

Up to 16 digits can be stored into the MESSAGE button.

### Operation

- Be sure the handset is in the cradle and the SP-PHONE button is off.
- Set the MEMORY switch of the proprietary telephone to "PROGRAM".

1. Press the MESSAGE button.
2. Dial (2).
3. Dial (9).

- You may dial 81 through 88 instead of 9.  
9... An extension can automatically select an Idle line within the CO line enable to call.  
81 through 88... An extension can select a trunk group designated.

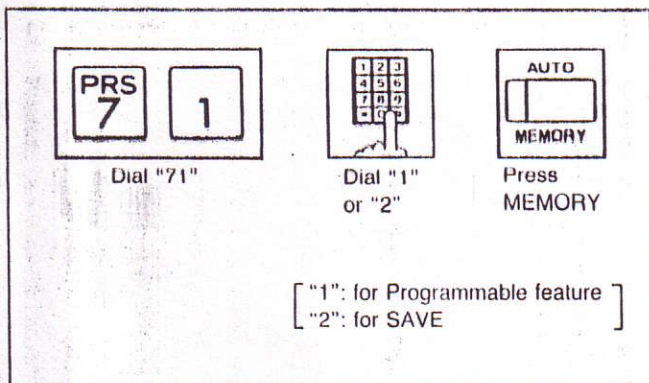

4. Dial the phone number.
5. Press the MEMORY button.

#### To return to the MESSAGE button:

1. Press the MESSAGE button.
2. Dial (3).
3. Press the MEMORY button.

- After programming the MESSAGE button, return the MEMORY switch to the "SET" position.

## F1/SAVE Selection

### Description

The SAVE button is not provided with KX-T30850, KX-T61650, KX-T123250, KX-T7020, KX-T7030 and KX-T7050.

The F1 button can be changed from programmable feature button to the SAVE button.

- dial1 mode ..... programmable feature function
- dial2 mode ..... SAVE function

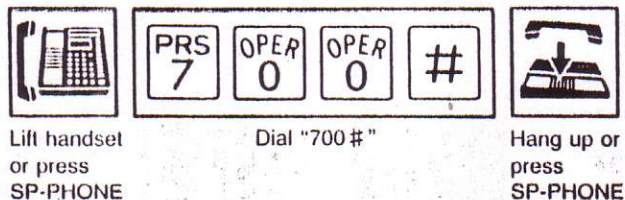

### Operation

- Be sure the handset is in the cradle and the SP-PHONE button is off.
  - Set the MEMORY switch of the proprietary telephone to "PROGRAM".
1. Dial (7) (1).
  2. Dial (1) for the programmable feature button or dial (2) for the SAVE button.
  3. Press the MEMORY button.
- After programming the F1 button, return the MEMORY switch to the "SET" position.

## Message Waiting

(See page 4-37 in another installation manual)

To cancel the message at the extension where the message is left.

### Description

The operation of Message Waiting is partially changed. Please correct it on page 4-37 in another installation manual.

### Operation

To cancel the message at the extension where the message is left.

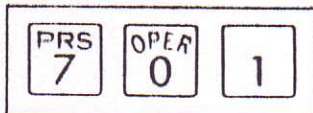

1. Lift the handset or press the SP-PHONE button.
2. Dial (700 #)  
The MESSAGE indicator will go out.  
All message will be canceled.
3. Hang up or press the SP-PHONE button.

## Message Waiting for a Standard Single Line Telephone

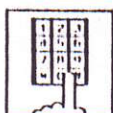

### Setting

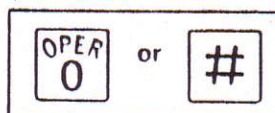

Lift handset

Dial "701"

Dial  
extension  
number

Dial "0" or "#"

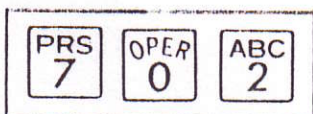

Hang up

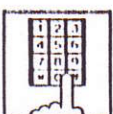

### Canceling a message

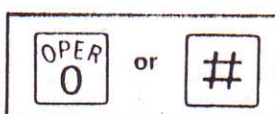

Lift handset

Dial "702"

Dial  
extension  
number

Dial "0" or "#"

Hang up

### Description

When the dialled intercom extension is busy or does not answer, a single line telephone can also inform the extension of a receiving sign. Only a telephone which has a MESSAGE button can receive the message.

### Operation

#### Setting

1. Lift the handset.
2. Dial (701).
3. Dial the extension number (100 through 199).
4. Dial (0) or (#).
5. Hang up.

#### Canceling a message

1. Lift the handset.
2. Dial (702).
3. Dial the extension number (100 through 199).
4. Dial (0) or (#).
5. Hang up.

### Last Number Redial

(See page 4-8 in another Installation Manual)

The KX-T7020, 7030, 7050 and 7130 can be used for Automatic Redialing of this feature.

### Call Transfer — To Extension

(See page 4-18 in another Installation Manual)

Pressing the TRANSFER button is also available to change the party to whom a call is transferred before hanging up.

Press the TRANSFER button to retrieve the call, then repeat the procedure of Call Transfer.

### Conditions

If the called party is busy or does not answer, you may return to the calling party also by pressing the TRANSFER button.

Transfer Recall Time is changed from "30 seconds or 15 seconds" to "30 seconds or 2 minutes".

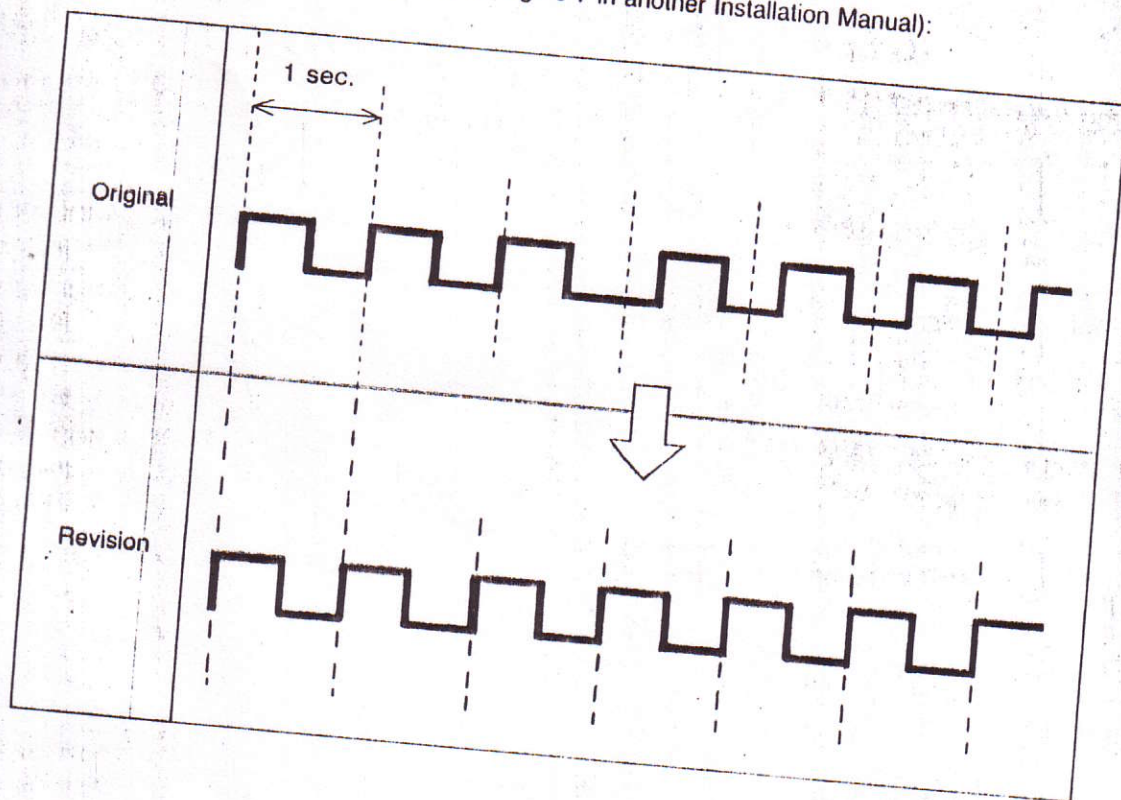

### Off Hook Call Announcement (OHCA)

(See page 4-23 in another Installation Manual)

The KX-T7130 can be used for this feature.

## Changed Features

- Busy tone is revised as follows (see page 6-7 in another Installation Manual):

## Toll Restriction

The selective use of this feature permits restricted dialing to specific stations. A Class of Service can be assigned to a particular station which prohibits or limits that station's dialing ability. The following are the available five Classes of Service.

TOLL RESTRICTION — DENIED CODE TABLE

|                                       | SERVICE CLASS |   |   |   |   |
|---------------------------------------|---------------|---|---|---|---|
|                                       | 1             | 2 | 3 | 4 | 5 |
| CLASS-2 DENIED CODE<br>(20 locations) | A             | D | D | D | D |
| CLASS-3 DENIED CODE<br>(20 locations) | A             | A | D | D | D |
| CLASS-4 DENIED CODE<br>(20 locations) | A             | A | A | D | D |
| CLASS-5 DENIED CODE<br>(20 locations) | A             | A | A | A | D |

TABLE-1

TOLL RESTRICTION — EXCEPTIONAL CODE TABLE

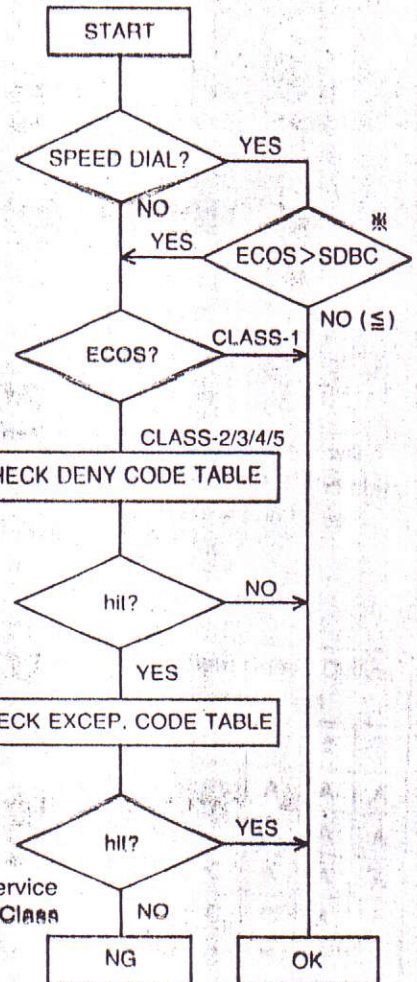

|                               | SERVICE CLASS |   |   |   |   |
|-------------------------------|---------------|---|---|---|---|
|                               | 1             | 2 | 3 | 4 | 5 |
| EXCEPTIONAL CODE<br>[01]~[05] | —             | E | E | E | E |
| EXCEPTIONAL CODE<br>[06]~[10] | —             | E | E | E | — |
| EXCEPTIONAL CODE<br>[11]~[15] | —             | E | E | — | — |
| EXCEPTIONAL CODE<br>[16]~[20] | —             | E | — | — | — |

TABLE-2

A: CALL IS ALLOWED  
D: DENIED OTHER THAN  
EXCEPTIONAL CODE

—: IGNORED  
E: ENABLE

※ECOS=Extension Class Of Service  
SDBC=Speed Dial Boundary Class

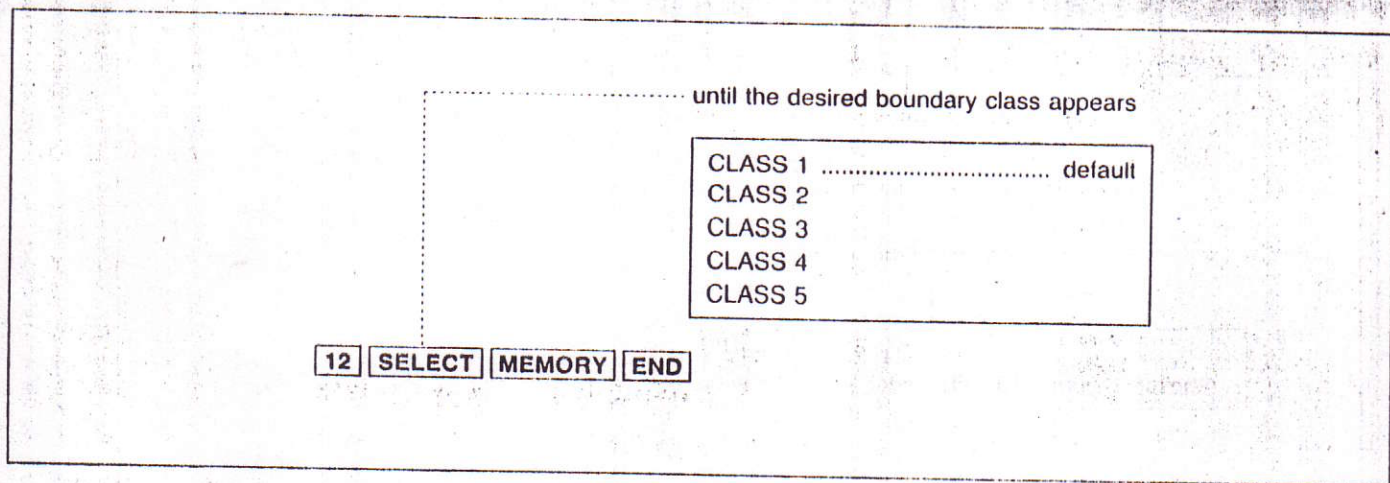

1. Service class 1 will allow all calls.
2. Service class 2 will deny 20 codes programmed as a denied code and allow 20 codes programmed as an exceptional code (location 01~20).
3. Service class 3 will deny 40 codes programmed as CLASS-2 and CLASS-3 denied code and allow 15 codes programmed as an exceptional code (location 01~15).
4. Service class 4 will deny 60 codes programmed as CLASS-2, CLASS-3 and CLASS-4 denied code and allow 10 codes programmed as an exceptional code (location 01~10).
5. Service class 5 will deny 80 codes programmed as CLASS-2, CLASS-3, CLASS-4 and CLASS-5 denied code and allow 5 codes programmed as an exceptional code (location 01~05).

The following should be set.

- "Toll Restriction of System Speed Dialing — Boundary Class Assignment" on page 14.
- "Toll Restriction — Denied Code Assignment" on page 15.
- "Toll Restriction — Exceptional Code Assignment" on page 16.
- "Service Class Assignment of Toll Restriction" on page 22.

## Toll Restriction of System Speed Dialing—Boundary Class Assignment

### Description

You can select the boundary class which is free from the speed dialing toll restriction.

### Programming

1. Dial (12).  
"Boundary Class-1" will be displayed and "1" will blink.
2. Repeat pressing the SELECT button until the desired class number appears, or dial the class number (1 through 5).
3. Press the MEMORY button.  
The LCD will stop blinking.
4. To return to the initial programming mode, press the END button.

### Conditions

If you set the boundary to CLASS 2, the system will allow system speed dialing on service class 1 and class 2, but restrict on service class 3, class 4 and class 5 according to the toll restriction checking.  
Refer to page 13.

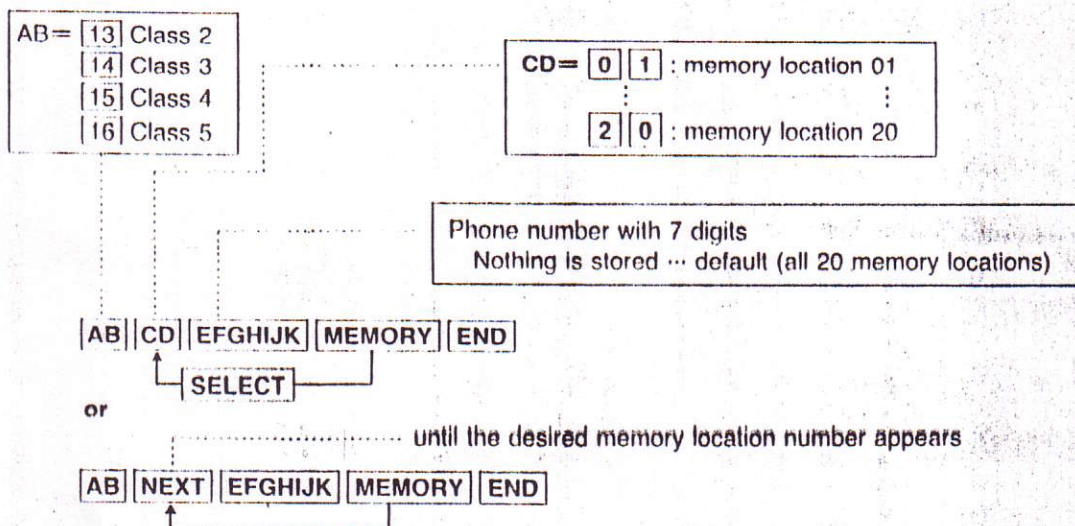

|               |   | System Speed Dialing Boundary Class |   |   |   |   |
|---------------|---|-------------------------------------|---|---|---|---|
|               |   | 1                                   | 2 | 3 | 4 | 5 |
| Service Class | 1 | A                                   | A | A | A | A |
|               | 2 | C                                   | A | A | A | A |
|               | 3 | C                                   | C | A | A | A |
|               | 4 | C                                   | C | C | A | A |
|               | 5 | C                                   | C | C | C | A |

A: allowed

See page 27.

## Toll Restriction—Denied Code Assignment

### Description

For Service Class 2, 3, 4 or 5 (see "Toll Restriction") up to 20 phone numbers can be selected for use in toll dialing.

Phone numbers programmed will be denied. All extensions programmed for Service Class Selections shall be assigned to the same denied code assignment plan.

### Programming

1. • Dial (13) for class 2.  
• Dial (14) for class 3.  
• Dial (15) for class 4.  
• Dial (16) for class 5.  
"Code NO? → " will be displayed.
2. Dial (01 through 20) or press the NEXT button.  
**Example:**  
When dial (01) or press the NEXT button.  
• The LCD will show "01: ....." when nothing is stored in memory location number "01".  
When the phone number 212 \* \* \* \* \* has been stored, "01: 212 \* \* \* \* \*" will be displayed.

3. Dial the 7-digit phone number.  
• To erase a wrong entry, press the CLEAR button.
4. Press the MEMORY button.  
• The MEMORY indicator will be lit.
5. • To advance to the next memory location number, press the NEXT button.  
• To return to the previous memory location number, press the PREV button.  
• To go to a desired memory location number, press the SELECT button and dial the memory location number.
6. Repeat steps 3 to 5.
7. To program denied code to another class, go to step 1.
8. To return to the initial programming mode, press the END button.

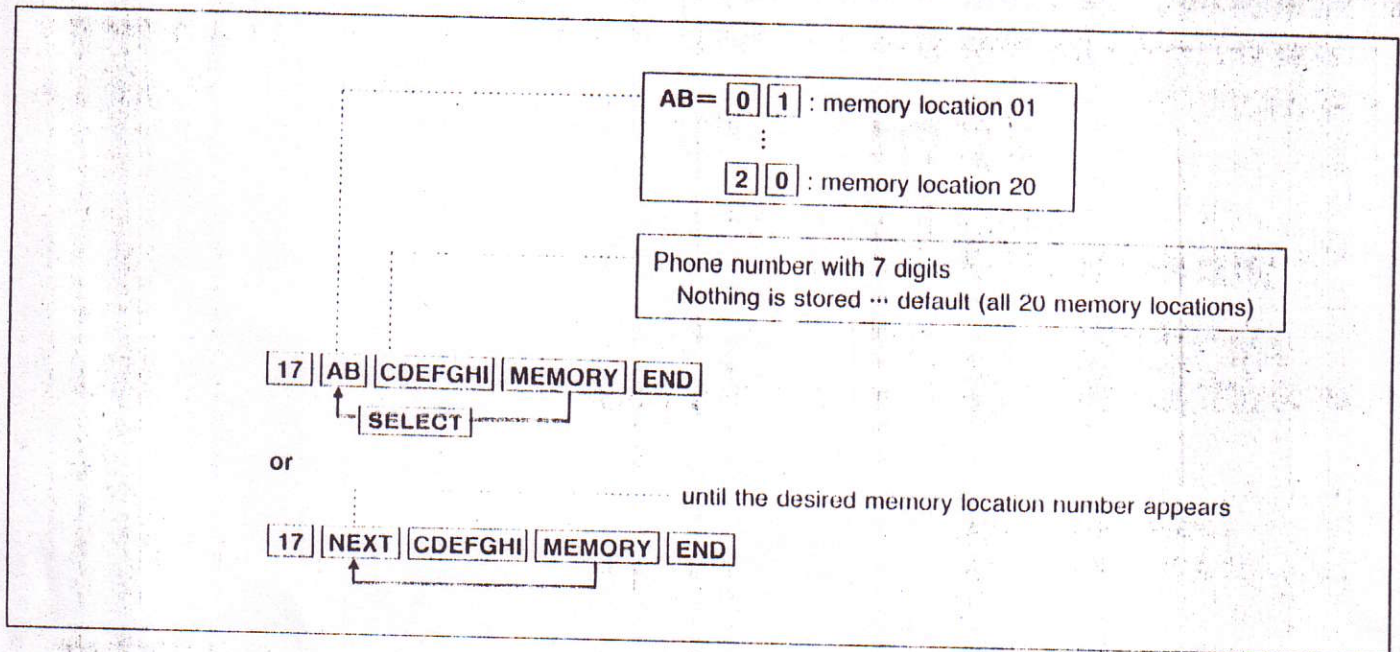

### Conditions

- Each phone number should consist of 7 digits.
- \* substitutes for a number.

### Programming Table

See pages 27 and 28.

## Toll Restriction—Exceptional Code Assignment

### Description

Through programming, the desired extensions will be allowed to dial the phone numbers which are restricted by "Denied Code Assignment". For Service Class 2, 3, 4 or 5 up to 20 phone numbers can be selected.

### Programming

- Dial (17).  
"Code NO? → " will be displayed.
- Dial (01 through 20) or press the NEXT button.  
**Example:**  
When dial (01) or press the NEXT button.  
  - The LCD will show "01: ....." when nothing is stored in memory location number "01".
  - When the phone number 1800 \* \* \* has been stored, "01: 1800 \* \* \*" will be displayed.
- Dial the 7-digit phone number.  
  - To erase a wrong entry, press the CLEAR button.
- Press the MEMORY button.  
  - The MEMORY indicator will be lit.
- To advance to the next memory location number, press the NEXT button.
  - To return to the previous memory location number, press the PREV button.
  - To go to a desired memory location number, press the SELECT button and dial the memory location number.
- Repeat steps 3 to 5.
- To return to the initial programming mode, press the END button.

### Conditions

- Each phone number should consist of 7 digits.
- \* substitutes for a number.

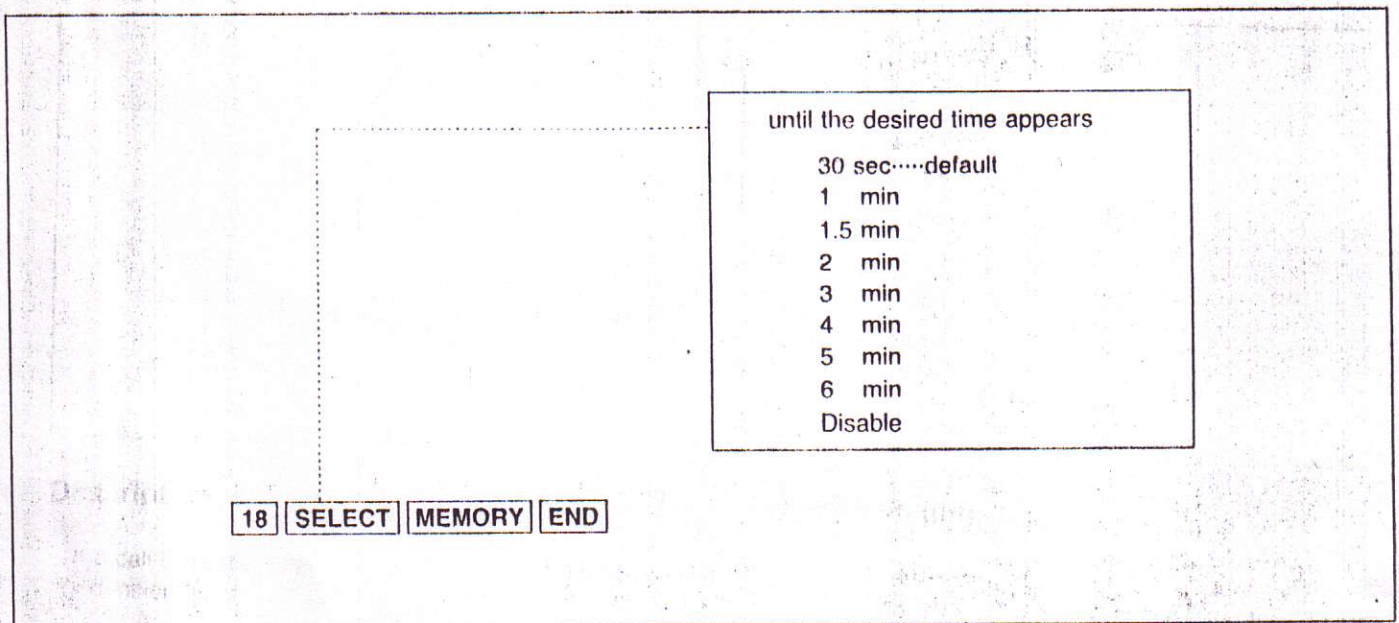

### Programming Table

See page 28.

#### ■ Applicable range to Service Class

| Exceptional Code | Service Class |   |   |   |
|------------------|---------------|---|---|---|
|                  | 2             | 3 | 4 | 5 |
| 01               | ↑             | ↑ | ↑ | ↑ |
| 02               | ↑             | ↑ | ↑ | ↑ |
| 03               | ↑             | ↑ | ↑ | ↑ |
| 04               | ↑             | ↑ | ↑ | ↑ |
| 05               | ↑             | ↑ | ↑ | ↓ |
| 06               | ↑             | ↑ | ↓ |   |
| }                |               |   |   |   |
| 10               |               |   | ↓ |   |
| 11               |               |   |   |   |
| }                |               |   |   |   |
| 15               |               | ↓ |   |   |
| 16               |               |   |   |   |
| }                |               |   |   |   |
| 20               | ↓             |   |   |   |

## Hold Recall Time Set

### Description

When the handset of the holding extension is replaced on call, you may have the automatic hold recall after the desired time elapses. The hold recall can be removed or added.

### Example:

1.5 minutes = 18 SELECT SELECT  
MEMORY END

### Programming

1. Dial (18).  
"Time: 30 sec" will be displayed and "30 sec" will blink.
2. Repeat pressing the SELECT button until the desired time is displayed.
3. Press the MEMORY button.  
The LCD will stop blinking.
4. To return to the initial programming mode, press the END button.

### Programming Table

See page 28.

## Transfer Recall Time

19 SELECT MEMORY END

until the desired mode appears

30 sec.....default  
2 min

### Description

If a call is transferred to an extension, and the other extension does not answer the transferred call within 30 seconds, the call will return to you. The time may be changed to 2 minutes.

### Programming

1. Dial (19).  
"Time: 30 sec" will be displayed and the "30 sec" will blink.
2. Press the SELECT button to alternate between "30 sec" and "2 min" to select the desired mode.
3. Press the MEMORY button.  
The LCD will stop blinking.
4. To return to the initial programming mode, press the END button.

### Programming Table

See page 28.

## System Data Dump

### • Stop Output

until the Stop Output appears

27 SELECT MEMORY END

### • All Parameters

### • System Parameter

### • Speed Dial

until desired data dump mode appears

All Para ..... default  
SystemPara  
CO Para  
EXT Para  
DSS Para  
Speed Dial  
Stop Output

27 SELECT MEMORY END

### • CO Parameter (Outside)

until the CO Para appears

AB= ☐ : to assign the same on all 12 CO's  
☐ 0 ☐ 1 : on CO 01  
.....  
☐ 1 ☐ 2 : on CO 12

27 SELECT MEMORY AB MEMORY END

### • Extension Parameter

until the EXT Para appears

AB= ☐ : to assign the same on all 32 jack numbers  
☐ 0 ☐ 1 : on jack number 01  
.....  
☐ 3 ☐ 2 : on jack number 32

27 SELECT MEMORY AB MEMORY END

### • DSS Parameter

until the DSS Para appears

A= ☐ : to assign the same on all 2 DSS's  
☐ 1 : on DSS 1  
.....  
☐ 2 : on DSS 2

27 SELECT MEMORY A MEMORY END

## Description

Six separate printouts are available.

They are (1) System parameters (2) CO parameters (3) Extension parameters (4) DSS parameters (5) Speed dial and (6) All parameters.

### (1) System parameters

- [00] Date and Time Setting
- [02] Extension Number Assignment
- [03] Operator Extension
- [04] Paired Telephone Assignment for DSS Console
- [05] Automatic CO Transfer Using DSS Button
- [06] Day/Night Service Mode
- [07] Day/Night Starting Time
- [08] Call Hunting
- [09] Hunting Type
- [12] Toll Restriction of System Speed Dialing
- [13] Class-2 Denied Code Assignment
- [14] Class-3 Denied Code Assignment
- [15] Class-4 Denied Code Assignment
- [16] Class-5 Denied Code Assignment
- [17] Exceptional Code Assignment
- [18] Hold Recall Time Set
- [19] Transfer Recall Time
- [20] Call Forwarding Starting Time
- [21] Pickup Dial Delay Time
- [22] CO-to-CO Duration Time Limit
- [23] RS-232C Communication Parameters
- [24] SMDR Parameters
- [25] Incoming/Outgoing Call Selection for printing
- [26] Secret Speed Dial/One Touch Dial Printing
- [28] Duration Time Count Start Mode
- [29] External Paging Access Tone
- [30] DTMF Receiver Selection
- [31] Direct Inward System Access
- [32] Off Premise Extension
- [33] Off Hook Call Announcement
- [44] Trunk Group Assignment
- [70] Day Door-Phone
- [71] Night Door-Phone

### (2) CO parameters

- [40] CO Connection Assignment
- [41] Dial Mode
- [42] Pulse Speed Selection
- [43] Host PBX Access Codes Assignment
- [44] Trunk Group Assignment
- [45] Flexible Outward Dialing Assignment-Day
- [46] Flexible Outward Dialing Assignment-Night
- [47] Flexible Ringing Assignment-Day
- [48] Flexible Ringing Assignment-Night
- [49] Delayed Ringing Assignment-Day
- [50] Delayed Ringing Assignment-Night
- [51] CO Day Mode Assignment
- [52] CO Night Mode Assignment
- [53] Pause Time Assignment
- [54] Hookswitch Flash Timing
- [55] Calling Party Control Signal
- [56] Disconnect Time
- [57] Automatic Designated CO Line Access

### (3) Extension parameters

- [Type] Telephone Type
- [60] Extension Group Assignment
- [61] Service Class Assignment of Toll Restriction-Day
- [62] Service Class Assignment of Toll Restriction-Night
- [63] Extension Name
- [64] Account Code Input Mode
- [65] Call Transfer to Outside Line
- [66] Call Forwarding to Outside Line
- [67] Executive Override
- [68] Do not Disturb Override
- [69] Standard Telephone Connection with Proprietary Telephone
- [PF] Feature Button
- [CO] Flexible Key
- [MW] Flexible MW Key

● If KX-T30850 is connected to an extension, [CO] Flexible Keys 01 through 12 show the following button assignment.

- |                  |                  |
|------------------|------------------|
| [CO] 01 ... CO1  | [CO] 08 ... DSS4 |
| [CO] 02 ... CO2  | [CO] 09 ... DSS5 |
| [CO] 03 ... CO3  | [CO] 10 ... DSS6 |
| [CO] 05 ... DSS1 | [CO] 11 ... DSS7 |
| [CO] 06 ... DSS2 | [CO] 12 ... DSS8 |
| [CO] 07 ... DSS3 |                  |

**(4) DSS Console parameters**

[Pair] Pair Extension No.

[DS] DSS Button Assignments

[PF] Programmable Feature Button

**(5) Speed Dial**

[01] System Speed Dialing Entry

Speed access codes (00 through 99) in which phone numbers are stored may be printed.

**(6) All parameters**

System parameters

CO parameters

Extension parameters

DSS parameters

Speed Dial

## Operation

### To stop the printout;

1. Dial (27).
2. Repeat pressing the SELECT button until "Stop Output" is displayed.
3. Press the MEMORY button.

### To print System Parameters, Speed Dial or All Parameters;

1. Dial (27).  
"Menu: All Para" will be displayed and "All Para" will blink.
2. Repeat pressing the SELECT button until the desired data dump mode is displayed.
3. Press the MEMORY button.  
SMDR printer will print out.
4. Repeat steps 2 to 3, to print the other data dumps.

### To print CO Parameters;

1. Dial (27).
2. Repeat pressing the SELECT button until the "CO Para" is displayed.
3. Press the MEMORY button.  
"CO NO ? → " is displayed.
4. Dial the CO number (01 through 12).  
When dialing (01),  
"CO NO ? → 01" will be displayed.
5. Press the MEMORY button.  
SMDR printer will print out.
6. Repeat steps 4 to 5, to print the other CO parameter.

### To print Extension Parameters;

1. Dial (27).
2. Repeat pressing the SELECT button until the "EXT Para" is displayed.
3. Press the MEMORY button.  
"Jack NO ? → " will be displayed.
4. Dial the jack number (01 through 32).  
When dialing (01),  
"Jack NO ? → 01" will be displayed.
5. Press the MEMORY button.  
SMDR printer will print out.
6. Repeat steps 4 to 5, to print the other jack number.

### To print DSS Console Parameters;

1. Dial (27).
2. Repeat pressing the SELECT button until the "DSS Para" is displayed.
3. Press the MEMORY button.  
"DSS NO ? → " will be displayed.
4. Dial the DSS number (1 or 2).  
When dialing (1),  
"DSS NO ? → 1" will be displayed.
5. Press the MEMORY button.  
SMDR printer will print out.
6. Repeat steps 4 to 5, to print the other DSS Console parameter.

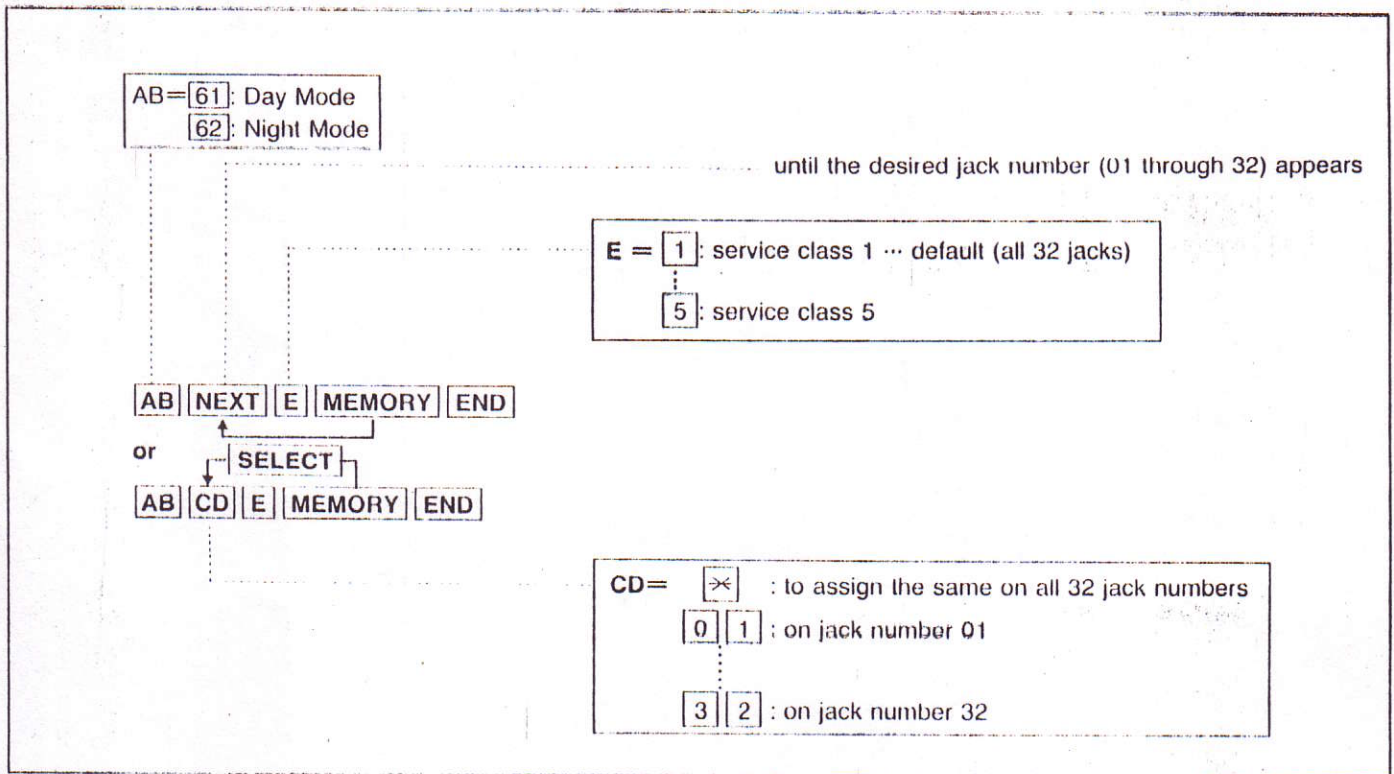

### After completing printing, to return to the initial mode;

1. Press the END button.

## Programming Table

See page 31.

## Service Class Assignment of Toll Restriction

### Description

Toll restriction can help eliminate telephone abuse and contribute to saving telephone costs. There are five service classes available for each extension.

|   | Service Class Selections                |                                                                                   |
|---|-----------------------------------------|-----------------------------------------------------------------------------------|
|   | Allowed                                 | Denied                                                                            |
| 1 | All calls                               |                                                                                   |
| 2 | any calls other than denied dial number | 20 codes programmed (Class 2 Denied Code other than exceptional cord)             |
| 3 | any calls other than denied dial number | 40 codes programmed (Class 2 and 3 Denied Code other than exceptional cord)       |
| 4 | any calls other than denied dial number | 60 codes programmed (Class 2, 3 and 4 Denied Code other than exceptional cord)    |
| 5 | any calls other than denied dial number | 80 codes programmed (Class 2, 3, 4 and 5 Denied Code other than exceptional cord) |

### Programming

- Dial (61) for day mode.
  - Dial (62) for night mode.

"Jack NO? →" will be displayed.
- Press the NEXT button or dial the jack number (01 through 32).  
" #01: Class-1" will be displayed and "1" will blink.
- Press the service class number (1 through 5).
- Press the MEMORY button.  
The LCD will stop blinking.
- To advance to the next jack number, press the NEXT button.
  - To return to the previous jack number, press the PREV button.
  - To go to a desired jack number, press the SELECT button and then dial the jack number.
- Repeat steps 3 to 5, to program the assignment on the other jack numbers.
- To return to the initial programming mode, press the END button.

### Programming Table

See pages 47 and 48.

### Example:

- Application of denied dial number and exceptional dial number to service class 2, 3, 4 and 5.

| Service Class | Denied Dial Number | Exceptional Dial Number |
|---------------|--------------------|-------------------------|
| 2             | 200 ××××           | 2201 ×××                |
|               |                    | 2301 ×××                |
|               |                    | 2401 ×××                |
| 3             | 200 ××××           | 2301 ×××                |
|               | 333 ××××           | 2401 ×××                |
| 4             | 200 ××××           | 2401 ×××                |
|               | 333 ××××           |                         |
|               | 444 ××××           |                         |
| 5             | 200 ××××           |                         |
|               | 333 ××××           |                         |
|               | 444 ××××           |                         |

- Entry of dial number to a code (memory location)

| Class-2 Denied Code |          |
|---------------------|----------|
| Code                | Dial No. |
| 01                  | 200 ×××× |
| 02                  |          |
| 20                  |          |

| Class-3 Denied Code |          |
|---------------------|----------|
| Code                | Dial No. |
| 01                  | 333 ×××× |
| 02                  |          |
| 20                  |          |

| Class-4 Denied Code |          |
|---------------------|----------|
| Code                | Dial No. |
| 01                  | 444 ×××× |
| 02                  |          |
| 20                  |          |

| Class-5 Denied Code |          |
|---------------------|----------|
| Code                | Dial No. |
| 01                  |          |
| 20                  |          |

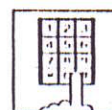

| Exceptional Code |          |
|------------------|----------|
| Code             | Dial No. |
| 01               |          |
| 02               |          |
| 03               |          |
| 04               |          |
| 05               |          |
| 06               | 2401 ××× |
| 07               |          |
| 08               |          |
| 09               |          |
| 10               |          |
| 11               | 2301 ××× |
| 12               |          |
| 13               |          |
| 14               |          |
| 15               |          |
| 16               | 2201 ××× |
| 17               |          |
| 18               |          |
| 19               |          |
| 20               |          |

- "F3-One Touch Button Mode Selection" is changed as follows.

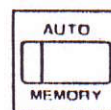

### F3-FWD/DND Button Selection for KX-T7050, KX-T123250, KX-T61650, KX-T30850

Dial "72"

Dial "1" or "2"

Press MEMORY

["1": for Programmable feature  
["2": for DND/FWD/Account code]

### Description

The F3 button can be changed from programmable feature button to call forwarding/do not disturb/account code button.

- dial "1" mode .....  
programmable feature function
- dial "2" mode .....  
call forwarding/do not disturb/account code function

### Operation

#### Setting

- Be sure the handset is in the cradle and the SP-PHONE button is off.
  - Set the MEMORY switch of the proprietary telephone (KX-T7050, KX-T123250, KX-T61650, KX-T30850) to "PROGRAM".
- Dial (7) (2).  
"Feature Button" will be displayed.
  - Dial (1) for programmable feature function or dial (2) for call forwarding/do not disturb/account code function.
  - Press the MEMORY button.
- After programming the F3 button, return the MEMORY switch to the "SET" position.

## Cancelled Features

The following features are cancelled from KX-T123210DB/KX-T123210D.

| Page of Installation Manual | Access code | Title                 |
|-----------------------------|-------------|-----------------------|
| 3-19                        | 13          | Area Code Selection-1 |
| 3-20                        | 14          | Area Code Selection-2 |
| 3-21                        | 15          | Area Code Selection-3 |
| 3-22                        | 16          | Area Code Selection-4 |
| 3-23                        | 17          | Hold Time Reminder    |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                        |    |         |                        |    |    |    |    |    |    |    |    |    |    |    |    |  |  |  |  |  |                  |             |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Jack number            |    |         |                        |    |    |    |    |    |    |    |    |    |    |    |    |  |  |  |  |  |                  |             |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |    |    |    |    |    | |                                                       |                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 01                     | 02 | 03      | 04                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                        |    |         |                        |    |    |    |    |    |    |    |    |    |    |    |    |  |  |  |  |  |                  |             |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                        |    |         |                        |    |    |    |    |    |    |    |    |    |    |    |    |  |  |  |  |  |                  |             |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |    |    |    |    |    | |                                                       |                 | Jack number                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                        |    |         |                        |    |    |    |    |    |    |    |    |    |    |    |    |  |  |  |  |  |                  |             |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |    |    |    |    |    | |                                                       |                 | 17                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 18                     | 19 | 20      | 21                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                        |    |         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                        |    |         | |                                                       | Disable         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                        |    |         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                        |    |         |                        |    |    |    |    |    |    |    |    |    |    |    |    |  |  |  |  |  |                  |             |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                        |    |         |                        |    |    |    |    |    |    |    |    |    |    |    |    |  |  |  |  |  |                  |             |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                        |    |         |                        |    |    |    |    |    |    |    |    |    |    |    |    |  |  |  |  |  |                  |             |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                        |    |         |                        |    |    |    |    |    |    |    |    |    |    |    |    |  |  |  |  |  |                  |             |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                        |    |         |                        |    |    |    |    |    |    |    |    |    |    |    |    |  |  |  |  |  |                  |             |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |        |   |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |         |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Jack number            |    |    |                                |                        |    |    |    |    |    |    |    |    |    |    |    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                        |    |    |                                |                        |    |    |    |    |    |    |    |    |    |    |    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                        |    |    |                                |                        |    |    |    |    |    |    |    |    |    |    |    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                        |    |    |                                |                        |    |    |    |    |    |    |    |    |    |    |    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                        |    |    |                                |                        |    |    |    |    |    |    |    |    |    |    |    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                        |    |    |                                |                        |    |    |    |    |    |    |    |    |    |    |    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                        |    |    |                                |                        |    |    |    |    |    |    |    |    |    |    |    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                        |    |    |                                |                        |    |    |    |    |    |    |    |    |    |    |    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                        |    |    |                                |                        |    |    |    |    |    |    |    |    |    |    |    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                        |    |    |                                |                        |    |    |    |    |    |    |    |    |    |    |    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                        |    |    |                                |                        |    |    |    |    |    |    |    |    |    |    |    |  | |                             |                 | Jack number                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                        |    |    |                                |                        |    |    |    |    |    |    |    |    |    |    |    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                        |    |    |                                |                        |    |    |    |    |    |    |    |    |    |    |    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                        |    |    |                                |                        |    |    |    |    |    |    |    |    |    |    |    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |    |    |                                |                        |    |    |    |    |    |    |    |    |    |    |    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                        |    |    |                                |                        |    |    |    |    |    |    |    |    |    |    |    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                        |    |    |                                |                        |    |    |    |    |    |    |    |    |    |    |    |  |
